

QUALE FUTURO PER L'INTERNET GOVERNANCE FORUM?

INCONTRO TEMATICO ORGANIZZATO DA ISOC ROMA CNR MARTEDÌ 30 NOVEMBRE

IGF NAZIONALI E REGIONALI

come si relazionano con l'IGF globale e come sono strutturati

Laura Abba

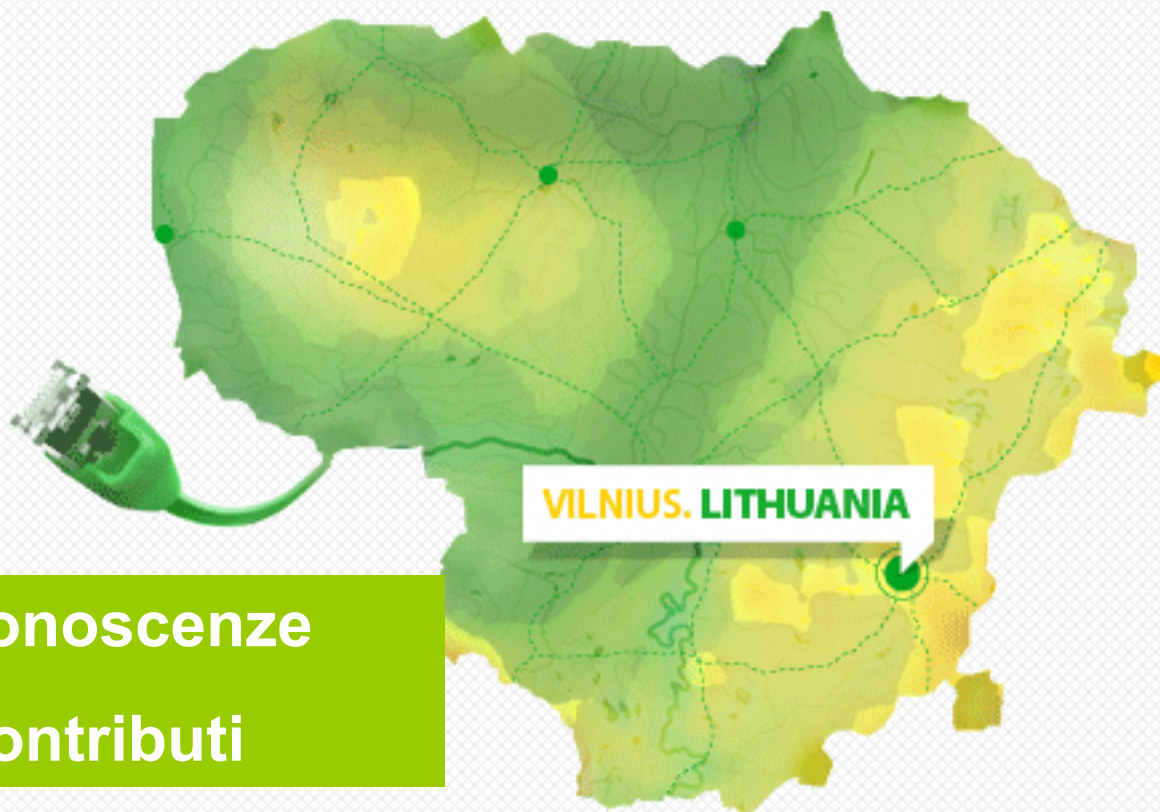

ISTITUTO DI INFORMATICA E TELEMATICA

Consiglio Nazionale delle Ricerche

IGF2010

5TH MEETING OF THE
INTERNET GOVERNANCE FORUM,
14-17 SEPTEMBER

1. Trasferire conoscenze
2. Preparare contributi

Round Table for National and Regional Meetings

IGF 2010, 17 September - Vilnius, Lithuania

- definire un modello comune di gestione degli IGFs?
- stabilire criteri comuni per assicurare la partecipazione multistakeholder?
- gli IGFs locali devono intervenire sulla definizione del programma del meeting IGF globale?
- i programmi dei meeting IGFs locali devono essere organizzati seguendo le linee del Forum globale?
- come e se formalizzare le relazioni fra IGFs nazionali, regionali e globali?

Quale legame con IGF globale?

Round Table for National and Regional Meetings

IGF 2010, 17 September - Vilnius, Lithuania

IGF NAZIONALI E REGIONALI

- IGF globale mantiene sul Web site l'elenco delle iniziative locali
- nessuna dipendenza da IGF globale
 - libertà di definire i programmi e i temi di interesse per la loro regione/nazione
- nessun finanziamento da parte di IGF globale
- nessun aiuto organizzativo da parte di IGF globale

a very light touch

Principi per essere riconosciuti dalla comunità

Round Table for National and Regional Meetings

IGF 2010, 17 September - Vilnius, Lithuania

- promosso da un gruppo di lavoro che fornisce supporto a una piattaforma di dialogo sui temi della IG (MAG Multistakeholder Advisory Group)
- aproccio multistakeholder
- bottom up nell'organizzazione
- aperto a tutti
- organizzato/finanziato dagli stakeholders locali

Essenziale che siano coinvolti

Round Table for National and Regional Meetings

IGF 2010, 17 September - Vilnius, Lithuania

IGF NAZIONALI E REGIONALI

- Governo
- Settore privato
- Parlamentari
- Settore ricerca e università
- Società civile globale

Raccomandazioni

Round Table for National and Regional Meetings

IGF 2010, 17 September - Vilnius, Lithuania

- a livello globale emergano le criticità locali così come esempi di best practice o di interventi legislativi
- a livello locale si riporti quanto accade nello IGF globale
- lo IGF globale faciliti e promuova lo scambio di informazioni e la interazione fra IGF locali
- un IGF locale deve coinvolgere utenti e imprese
- un IGF nazionale non deve essere guidato dal governo, ma il governo deve partecipare

About UK IGF

<http://www.ukigf.org.uk>

The UK Internet Governance Forum is a collaborative partnership between Nominet, the UK Department for Business and key parliamentarians.

Its aim is to provide a local forum in the UK that engages industry, government, parliament, academia and civil society in debate on Internet Governance issues. As well as encouraging partnerships and coalitions that deliver solutions and demonstrate best practice for others to learn from.

Other influential stakeholder groups that are taking part include the London Internet Exchange, the Coalition on Internet Safety and Amnesty International.

The UK IGF will concentrate on developing examples of UK best practice and serve as a potential prototype model for other national IGFs. Rt Hon Alun Michael MP commented that Tanya Byron's recent review of the online child protection sphere has highlighted the successful partnership initiative between the Internet Watch Foundation and the Child Exploitation & Online Protection Unit. These organisations have successfully combined resources and expertise from law enforcement, industry and the third sector as well as working closely with the Home Office's Online Child Protection Task Force.

One of the key messages to emerge from the first UK IGF meeting is that the UK is taking a leading role in Internet governance, and that other countries are seeing what we are doing and beginning to start running their own processes at the national level. Brazil, France and Finland are among the first countries to follow the UK's 'best practice' model. The UK is proving to the rest of the world that the Internet Governance Forum works, as a collaborative partnership between Government, business, civil society and academia, because it is not subject to Government legislation and is free from bureaucracy.

ABOUT

- The Pan-European dialogue on Internet governance (EuroDIG) is an open platform for informal and inclusive discussion and exchange on public policy issues related to Internet Governance (IG) between stakeholders from all over Europe.
- It was created in 2008 by a number of key stakeholders representing various European stakeholder groups working in the field of IG.
- The purpose of EuroDIG is twofold:
 - first to help European stakeholders to exchange their views and best practices on the issues to be discussed at global IGF meetings and to identify common ground which is shared by all European stakeholders as well as highlighting the diversity of experience of the different European stakeholders;
 - second to raise awareness in Europe and among European stakeholders about the relevance of the issues discussed in the IGF context and also to raise awareness of the value of the new multistakeholder discussion format developed by and around the IGF.

About CGI.br

Who we are

The Brazilian Internet Steering Committee (CGI.br) was created by Interministerial Ordinance 147 of May 31st, 1995, which was amended by Presidential Decree 4,829 of September 3rd, 2003, with the purpose of coordinating and integrating all Internet service initiatives in Brazil, as well as promoting technical quality, innovation and the dissemination of the services available.

Highlights

The mission of the CGI.br involves certain rights and responsibilities, which include:

- coordinating the allocation of Internet addresses (IPs) and registration in the <.br> domain;
- establishing strategic directives related to the use and development of the Internet in Brazil;
- collecting, organizing and disseminating information on Internet services, including indicators and statistics.

Our history

In a Joint Notice from May 1995, the Ministry of Communication (MC) and the Ministry of Science and Technology (MCT) asserted that in order to effectively promote the participation of Society in decisions regarding implementation, management and use of the Internet, an Internet Steering Committee would be created.

The members of the CGI.br

The Brazilian Internet Steering Committee is composed of 21 members, as follows: nine representatives from the Federal Government; four representatives from the corporate sector; four representatives from the third sector, three representatives from the scientific and technological community and one Internet expert.

<http://www.cgi.br>

The members of the CGI.br

The Brazilian Internet Steering Committee is composed of 21 members, as follows:

- nine representatives from the Federal Government
 - Ministry of Science and Technology;
 - Ministry of Communication;
 - Presidential Cabinet;
 - Ministry of Defense;
 - Ministry of Development, Industry and Foreign Trade;
 - Ministry of Planning, Budget and Management;
 - National Telecommunication Agency;
 - National Council for Scientific and Technological Development;
 - National Council of State Secretariats for Science, Technology and Information Issues - CONSECTI.
- Four representatives from the corporate sector
 - Internet access and content providers;
 - Telecommunication infrastructure providers;
 - Hardware, telecommunication and software industries;
 - Enterprises that use the Internet.
- Four representatives from the third sector
- Three representatives from the scientific and technological community
- One Internet expert

<http://www.cgi.br>

Mission

The mission of the CGI.br involves certain rights and responsibilities, which include:

- proposing policies and procedures regarding the regulation of Internet activities;
- recommending standards for technical and operational procedures for the Internet in Brazil;
- establishing strategic directives related to the use and development of the Internet in Brazil;
- promoting studies and technical standards for network and service security in the country;
- coordinating the allocation of Internet addresses (IPs) and registration in the <.br> domain;
- collecting, organizing and disseminating information on Internet services, including indicators and statistics.

Principles for the Governance and Use of the Internet

In 2009, the Brazilian Internet Steering Committee - CGI.br, approve the Resolution CGI.br/Res/2009/03/P

1. Freedom, privacy and human rights
2. Democratic and collaborative governance
3. Universality
4. Diversity
5. Innovation
6. Neutrality of the network
7. Unaccountability of the network
8. Funzionalità, security and stability
9. Standardization and interoperability
10. Legal and regulatory environments

Riassumendo

- Dal 2006 iniziano a diffondersi le prime iniziative di IGF locali
- Queste iniziative si ispirano ai principi dell'IGF globale ma hanno vita propria
- Si caratterizzano per differenti obiettivi e priorità
- IGF non ha struttura formale
- IGF è un processo informale multistakeholder bottom-up per migliorare il dialogo fra tutti gli attori del sistema Internet
- L'Igf non è una consultazione del settore privato e della società civile
- Non esiste un regolamento per il suo funzionamento
- Esistono solo raccomandazioni da parte della comunità

Riassumendo

Differenti fra loro

Simili nell'organizzazione

Approccio bottom-up

Finanziati da organizzazioni pubbliche

Contesto globale comune
